SCBA (Respiratory) Testing and Repairs

Did you know?

- All SCBA must meet NIOSH standards and firefighting equipment must meet NFPA standards
- NFPA states that all SCBA shall be tested at least annually
- NIOSH standards state that all SCBA and SKA Paks shall be tested every 2 years
- All cylinders must be hydrostatically re-tested by an approved Transport Canada facility—carbon fibre and aluminum – 5 years
- All composite and carbon fibre bottles have a 15-year lifespan
- Aluminum cylinders do not have a predetermined lifespan
- Breathing Air Compressors can only be serviced on-site through our Mobile Services

Is downtime a concern?

We also provide rental options to cover your short- or long-term needs.

90-Day Warranty on Services and Parts
